I. DESCRIPTION OF THE ACTIVITIES OF THE BUREAU AND ALL DESIGNATED AGENCIES DURING THE PRECEDING YEAR

The Bureau of Adult Protective Services (BAPS) is responsible for receiving and investigating all suspected reports of elderly or adults with a disability abuse or neglect. *Elderly* refers to a person age sixty (60) years or older. *Adult with a disability* is any person eighteen (18) years or older who has a physical or mental impairment which limits one (1) or more major life activities; or has a history of, or has been classified as having, an impairment which substantially limits one (1) or more major life activities. Major Life Activities include, but are not limited to: caring for oneself, performing manual tasks, standing, walking, seeing, hearing, eating, sleeping, lifting, bending, speaking, breathing, learning, reading, concentrating, thinking and working.

The mission of the BAPS is to provide protective services to the elderly and adults with a disability in a manner least restrictive with respect to their dignity and in consideration of the values and practices of their culture.

On December 28, 2012, Public Law (P.L.) 31-278 updated Guam's Adult Protective Services (APS) mandates (P.L. 19-54 and P.L. 21-33). The updates of P.L. 31-278 refined the definitions for the types of abuse reported to APS; expanded the list of Mandated Reporters to include Emergency Medical Service (EMS) providers, non-emergency medical transport providers, medical and allied health providers, personnel of banking or financial institutions, pension providers and practicum students in the health and human services; defines the organizational and personnel structure of the Bureau of Adult Protective Services (BAPS); and in Sub-Section 2954, a new provision was added that created the BAPS Fund which provides for all fines collected from any person required by Subsections (a) and (b) of §2952 to report a case of suspected elderly or adult with a disability abuse and fails to make a report to APS, to be deposited into the Fund and shall be expended exclusively for purposes used to support the operations of the BAPS.

During the 1st and 2nd quarters of FY 2017, the BAPS was staffed by three (3) Social Worker III and a Social Services Supervisor I. On March 24, 2017, Ms. Eileen Escalera laterally transferred to another Bureau within the Department and recruitment for the vacated Social Worker position was in process until the position was filled five (5) months later on August 14, 2017 through the lateral transfer of Ms. Nilda Orenca, formerly with the Bureau of Social Services Administration, Division of Public Welfare.

The primary function of the BAPS social workers is case investigation. Upon receiving a referral of alleged abuse or neglect, the social worker(s) meets with the client to assess the situation and proceeds with investigating the allegation(s) of abuse or neglect and develops a case plan which addresses the client's needs in order to intervene if not resolve the abusive situation. Intervention

strategies used by the social workers include: crisis intervention, education, protective shelter, multi-disciplinary team meetings, individual and family sessions, and networking with other government and private agencies to provide formal support services. Another key function is outreach and prevention efforts. Outreach presentations are provided to educate and inform government, private and non-profit entities and the general public of the services available through the BAPS for the prevention of elderly and adults with a disability abuse and neglect.

Further, BAPS administers the Guma Serenidad Program, formerly known as the Emergency Receiving Home, through a contract agreement with Catholic Social Service (CSS) for the Comprehensive Management, Operations, and Maintenance of Protective Services and a Crisis Intervention Hotline (CIH) for seniors, age 60 and older, and adults with a disability, age 18-59, who are victims or alleged victims of abuse and are in immediate or imminent danger and require temporary shelter and support to protect them from further abuse or neglect. The contract between the Department of Public Health and Social Services, Division of Senior Citizens (DPHSS, DSC) and CSS became effective January 1, 2016, upon award of Invitation for Bid No. GSA-003-16 to CSS for a period of 60 months or five (5) years; on a year to year basis. In FY 2017, the service period of October 1, 2016 through September 30, 2017 covers months 10 through 21 of the 60-month agreement between DPHSS and CSS.

The Crisis Intervention Hotline (CIH) receives, responds, and manages reports of suspected elderly or adults with disability abuse and neglect. APS referrals received by the CIH between the hours of 8:00 a.m. through 4:30 p.m., Monday through Friday, except on recognized Government of Guam holidays and weekends, are forwarded to the BAPS for investigation, and referrals received after 4:30 p.m., Mondays through Friday and on recognized Government of Guam holidays and weekends are managed by Guma Serenidad staff.

BAPS also administers the Office of the Long Term Care Ombudsman and activities related to Elder Abuse Prevention, Title VII programs. The Office of the Ombudsman provides services to the elderly at St. Dominic's Senior Care Home, Guam Memorial Hospital Authority Skilled Nursing Unit (GMHA, SNU) and the three Adult Day Care Centers. The Ombudsman visits elderly to meet with them and/or their family members to address, advocate, and resolve concerns for the protection of the resident's health, safety, and welfare while ensuring the rights of residents are safeguarded.

OUTREACH AND ADVOCACY:

BAPS participated in several outreach activities in FY 2017 which include:

In February 2016, the Division of Senior Citizens, DPHSS along with other key partner agencies of the Guam Coalition Against Sexual Assault and Family Violence (GCASAFV) submitted a grant to the U.S. Department of Justice (DOJ), Office of Violence Against Women (OVW) to administer the “*Enhanced Training and Services to End Abuse In Later Life Program*”. The team was comprised of representatives from the DPHSS, Division of Senior Citizens, Bureau of Adult Protective Services (DSC, BAPS); Guam Police Department; Office of the Attorney General, Prosecution Division; Guam Coalition Against Sexual Assault and Family Violence (GCASAFV); Catholic Social Service, Alee Shelter; Judiciary of Guam; and the Governor’s Community Outreach-Federal Programs Office, key partners for this grant. In submitting the grant application, the team developed a local program name, the TASI Project, which stands for *Training & Advocacy Services Initiative*. On September 15, 2016, the U. S. Department of Justice, Office of Violence Against Women (OVW), issued a notice of grant award in the amount of \$375,000.00 to the DPHSS/DSC for the administration of the OVW Abuse in Later Life (ALL) grant for a period of 36 months.

IV. INFORMATION ON THE QUALITY OF SERVICES PROVIDED AND THE RESULTS OF SUCH SERVICE IN TERMS OF ALLEVIATING ABUSE

Currently, the BAPS continues to meet the mandates of Public Law 31-278 by providing intervention in abusive situations and assisting clients and their families in obtaining supportive social services, as practicable. Oftentimes, the BAPS serves as the entry point into Guam’s long term services and support system for elderly or adults with disabilities. It is the experience of the BAPS social workers that abuse and neglect are not always intentional, but rather caused by caregiver stress and a lack of knowledge on how to care for their elderly parents or family member who is an adult with disabilities. Through BAPS intervention, caregivers are provided with information on caregiving and linkage to relevant support systems. In most instances, the needs of the APS clients are met thus, alleviating the abusive situation. Eight (8) cases were substantiated in FY 2017 with one (1) case for financial/property exploitation forwarded to the Office of the Attorney General for further disposition.

The BAPS addresses abuse from a social service as opposed to a law enforcement perspective. As such, this allows clients to make informed decisions as to how they can help themselves alleviate their abusive situation. The clients’ basic right to self-determination is promoted while maintaining their integrity and dignity. Without the BAPS, the only recourse for elderly and adults with disabilities would be assistance from the Guam Police Department. Many incidences of abuse would not be addressed as BAPS clients are reluctant to use police enforcement as a means of resolution, especially in cases involving family members or their primary caregiver. Successful intervention is a continual learning experience of family dynamics, linking available community resources and having a neutral party facilitate through the emotionally laden journey; this has proven to be the most effective means for BAPS to serve their clients.

An important component of the BAPS is the Guma Serenidad/Crisis Intervention Hotline program. Through the Crisis Intervention Hotline, protective services are available seven days a week, twenty-four hours a day, ensuring that elderly and adults with disabilities have access to BAPS services at all times. Availability of the Guma Serenidad has proven essential to the safety of victims of abuse and neglect. The protective shelter affords a safe haven during a crisis. Without the shelter, clients of BAPS would probably remain in the abusive home environment or be placed into a homeless shelter until alternate living arrangements are made.

V. IDENTIFICATION OF PROBLEMS THAT MAY ARISE IN THE IMPLEMENTATION OF THIS ARTICLE

1. Public Law 31-278 provides for mandated reporting of suspected elderly or adults with disabilities abuse or neglect for professionals who in the course of their employment come into contact with elderly and persons with disabilities. The law further provides immunity

from liability for those individuals who make reports in good faith. However, the law does not provide sanctions for the falsifying of reports. During the course of case investigations, if it is determined by APS social workers that case referrals were not made in good faith, absent any provision for penalties for falsifying reports under this provision, there does not appear to be any means to discourage this action on the part of individuals committing such an act.

2. Public Law 31-278 does not address alleged perpetrators who refuse to cooperate in an APS investigation. Further, APS does not possess the authority to require alleged perpetrators to cooperate with APS investigations which is a contributing variable resulting in higher percentage of inconclusive investigations (unsubstantiated).
3. Although P.L. 31-278 defines the types of abuses in the mandate, the mandate needs to add penalties for substantiated cases of abuse or neglect specific to elders or adults with disabilities, in cases of abandonment, emotional/psychological abuse and neglect. Substantiated cases of physical or sexual abuse are criminal in nature and are forwarded to the Attorney General's Office for their disposition. The Attorney General may investigate and decide whether to initiate criminal proceedings. Cases of substantiated financial or property exploitation can be referred to other legal avenues for possible recourse; however, substantiated cases of abandonment, emotional/psychological abuse and neglect which do not fall under any laws and as such, carry no penalties.
4. Expansion of Services. During the investigations, especially of alleged neglect situations, it has been determined that the neglect of APS clients was not intentional but rather due to lack of services to support family members in their role as caregivers or to assist an adult individual living in the community requiring some level of formal support that cannot be readily provided by family or friends, either due to limited or competing demands the family is managing or the local resource is limited or non-existent.
5. Long Term Care. Long term care needs for the elderly and adults with disabilities is a major challenge for APS clients and their families; clients who do not have family members to care for them on a long term basis. Additionally, many families require to be gainfully employed to maintain their household while the elderly and adults with disabilities often require supervised care, thus, families are constantly challenged with providing care for them in their homes while maintaining their employment for their own survival. The need for placement options on a long term basis for either alternative residential placement or for therapeutic purposes is without question. At times, clients may be rotated among shelter residential type programs with the client(s) being admitted into the existing array of shelter services multiple times which is a band aid approach to the real issue and may bear liability issues in the future. This situation requires a permanent and responsive solution to this growing need in our community, assisted living facilities would be an option to explore. Further, additional funding to support existing therapeutic group homes as well as weekend provision of services for Adult Day Care services for seniors could help provide some relief to this growing need. For the latter, it could be for those families who require such services, thus, a thorough screening process would need to be implemented to ensure those approved for services meet

the preset criteria and given the reality of limited funding for this service, clients could be afforded services on a rotational basis. Although this is not the preferred manner to provide services, it does provide relief and support to Guam's caregivers while ensuring care recipients are provided quality weekend service in a supervised setting.

VI. RECOMMENDATIONS FOR ACTION ON THE PART OF THE LEGISLATURE WHENEVER DEEMED VITAL FOR THE PROTECTION OF THE ELDERLY AND ADULTS WITH A DISABILITY

As recommended in prior year reports, legislation needs to be enacted to expand and fund programs for independent living, alternative/transitional homes and assisted living facilities (non-medical) to address the needs of clients admitted into the protective shelter during crisis, but due to limited resources and services in our community, are difficult to transition out of the protective shelter, as more clients are requiring therapeutic and non-medical assisted care.

A second recommendation would be for the provision of law to be enacted for Legal Assistance Services for the elderly to be provided through the Office of the Attorney General or the Public Defender's Office or both as many of the legal requests fall on ensuring the protection of the interests of our seniors; protection and advocacy to ensure legal services are provided to safeguard and protect the rights of our seniors. The partnership between the Division of Senior Citizens and a government legal arm would promote efficiency and greater access to legal services given the current cost to provide legal services and the cost of an attorney at either of the two offices noted in this recommendation.
