Guam Breast & Cervical Cancer Early Detection Program

Tumon Bay, Guam

DEPARTMENT OF PUBLIC HEALTH AND SOCIAL SERVICES,
DIVISION OF PUBLIC HEALTH,
BUREAU OF PROFESSIONAL SUPPORT SERVICES

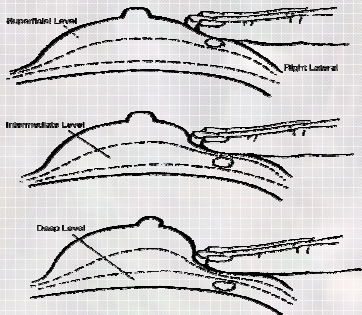

Government of Guam

The Guam Breast & Cervical Cancer Early Detection Program (GBCCEDP) is a 100% federally funded program that provide **FREE** breast and cervical cancer screening to qualified women.

What is breast and cervical cancer screening ?

Breast and cervical cancer screening include the following:

- Clinical Breast Exam (CBE)
- Mammogram
- Pelvic Exam
- Pap test

Breast Cancer Screening

What is Clinical Breast Exam (CBE)?

A clinical breast exam (CBE) is a physical exam done by a health care provider that involves looking at and feeling the breasts and underarm for any changes or abnormalities (such as a lump). The breasts are checked while you are sitting up and while you are lying down.

What is a Mammogram?

Mammogram is x-ray of the breast that can find lumps and other changes often before they can be felt.

Cervical Cancer Screening

What is a Pelvic Exam?

A pelvic examination is a physical exam of a woman's pelvic organs by a health professional which is done to help detect certain cancers in their early stages, infections, or other reproductive system problems.

What is a Pap Test?

A Pap test is a simple, fast and painless test done in a doctor's office or clinic that may detect abnormal cells in the cervix caused by Human Papilloma Virus (HPV) which occur before the development of cervical cancer
