COVID-19 Mitigation Plan: V.G. Gozum Construction, LLC.

As we fervently exercise caution and monitor the current situation here in Guam and the announcements and protocols of the Government of Guam as well as the Department of Public Health and Social Services, we would like to submit our precautions as part of our contingency plan for continuing work in our projects during this pandemic. Here are the following guidelines for our employees' compliance.

JOBSITE BASICS

- Employees scheduled on the said jobsite will be the only persons to be present with the exemption of the Owners/Field Ops Managers
- Number of employees will be determined by the scope of work per area/section to avoid over-crowding
- Temperature scanning before entering the site premises that includes a COVID-19 questionnaire. If an employee fails the temperature scanner a re-test is done in 15 minutes, if the employee still fails he will be sent home and advice to call DPHSS for proper COVID-19 guidelines.
- Masks or other similar face covering must be worn on site at all times alongside proper personal protective equipment.
- Proper sanitation such as, but not limited to, washing of hands properly, use of alcohol or hand sanitizers (as often as needed)
- Follow Prime Contractors COVID-19 Mitigation plans whichever is stringent.

EMPLOYEES

- Dedicated spot to leave belongings (highly recommending to bring minimal personal belongings as possible)
- Observe social distancing especially during break times. Employees are encouraged to take breaks inside their own personal vehicles.
- No sharing of personal items/effects (water, food, lighter, etc.)
- Continuous practice of proper self-sanitation before and after work responsibilities and breaks

- Employees who have traveled to areas with COVID-19 would be subject to a 14 day quarantine as per DPHSS guidelines.

SUSPECTED OR CONFIRMED POSITIVE

In the event that an employee is suspected or confirmed positive all close contacts of that employee will be notified. Immediate self-quarantine will be implemented and a test will then be coordinated to all close contacts through the Seven Day Adventist Clinic. Upon issuance of test results Individuals found positive will be isolated based on DPHSS guidelines. Further Individuals who tested negative will have to adhere to DPHSS guidelines until cleared for work by DPHSS.

FOR COVID-19 INQUIRIES DIAL 311

Please know that as we implement these safety measures, we will adjust them as needed while we strive to work around this new normal.

V.G. GOZUM CONSTRUCTION LLC MANAGEMENT

Guidance on the Contact of a Close Contact of a Confirmed or Suspected Case of COVID-19

Person A: CASE
Laboratory-confirmed positive for COVID 19

Person B: CLOSE CONTACT
"Close contact" with Person A

- Considered "Medium to High Risk"
- Individuals who were within 6 feet of Person A for a prolonged period of time (more than 15 minutes) or had direct contact with their secretions (e.g. coughed on).

Person C: CONTACT OF A CONTACT
Any person who is in contact of Person B (e.g. spouse, children, parents, co-workers, friends, etc.) is considered "Low Risk."

Household Members:

- If an asymptomatic (no symptoms) person is contacted by DPHSS to be notified that they are a close contact of a confirmed COVID-19 case, they should remain home, practice social distancing, and monitor for symptoms.
- Any child, spouse or other household members of this asymptomatic contact are a "contact of a contact" and therefore are not required to take any special precautions. They can go to school, work, and engage in other activities but must practice social distancing, wash hands often and wear face covering.

Co-workers:

- If an asymptomatic employee calls their supervisor and notified them that they are required to stay home because they were a close contact of a confirmed case, the contacts they had at work are considered "contacts of contact," are not required to take any special precautions. They should be permitted to continue to work but must practice social distancing, wash hands often and wear face covering.

How long should close/household contacts of a confirmed COVID-19 case remain home while monitoring themselves?

- **Symptomatic** contacts: Must self-isolate at home until at least 24 hours have passed since last fever, without the use of fever reducing medicine **AND** other symptoms, such as cough and shortness of breath have improved **AND** at least 10 days have passed since symptoms first appeared. After self-isolation ends, the person may return to normal activities including work and school but must practice social distancing, wash hands often and wear face covering.
- **Asymptomatic** contacts: If the confirmed case remains a close contact after symptoms develop, the asymptomatic contact would self-isolate for 14 days AFTER the COVID-19 case is no longer required to self-isolate. If the asymptomatic contact no longer has close contact with the confirmed case, they would self-isolate for 14 days AFTER they last came into contact with the confirmed case.

Do "contact of contacts" need to take any special precautions?

- No. A person who is a contact of a contact does not have any restrictions and can continue with normal activities such as going to work or school but must practice social distancing, wash hands often and wear face covering. If this person later develops symptoms, see instructions listed above for **symptomatic** contacts.
