COVID 19 MITIGATION PLAN

- • Encourage workers to stay home if they are sick.
- • Allow workers to wear masks over their nose and mouth to prevent them from spreading the virus.
- Continue to use other normal control measures, including personal protective equipment (PPE), necessary to protect workers from other job hazards associated with construction activities.
- • Advise workers to avoid physical contact with others and direct employees/contractors/visitors to increase personal space to at least six feet, where possible.
- • Train workers how to properly put on, use/wear, and take off protective clothing and equipment.
- • Encourage respiratory etiquette, including covering coughs and sneezes.
- • Promote personal hygiene. If workers do not have immediate access to soap and water for handwashing provides alcohol-based hand rubs containing at least 60 percent alcohol.
- • To the extent tools or equipment must be shared, provide and instruct workers to use alcohol-based wipes to clean tools before and after use. When cleaning tools and equipment, workers should consult manufacturer recommendations for proper cleaning techniques and restrictions.
- • Keep in-person meetings (including toolbox talks and safety meetings) as short as possible, limit the number of workers in attendance and use social distancing practices.
- • Hand sanitizer dispensers should be filled regularly. Frequently touched items should be disinfected.
- • Encourage workers to report any safety and health concerns.
- ■ No worker tested positive will be accepted to work.
