

# **COVID-19 MITIGATION GUIDELINES**

### COVID-19 CONTROL AND PREVENTION

TEREAS, INC. is committed to maintaining a safe and healthy work environment for our employees.

TEREAS, INC. remains alert of the changing outbreak conditions, including as they relate to community spread of the virus and testing availability and implementation of infection prevention measures accordingly. TEREAS, INC. is committed to assessing the hazards to which its employees may be exposed; evaluate the risk of exposure and is committed to selecting, implementing and ensuring workers use controls to prevent exposure.

## SCREENING PROCEDURES AND CHECKLIST

TEREAS, INC. Screening procedure and checklist is done on a daily basis prior to each employee accessing the work site. Please see screening form and requirement. Each employee is pre-screened with questions and temperature checks logged.

ote 1:	Please advise all workers that social distancing and wearing of cloth face coverings is still a requirement on the site.					
lote 2:	Please submit this form after each shift with your daily report.					

#### COVID-19 TRAINING AND INFORMATION

Employees are provided training and information for prevention of COVID-19.

Signs of COVID-19:

- The signs and symptoms of COVID-19 and an explanation of how the disease is potentially spread, including the fact that infected people can spread the virus even if they do not have symptoms.
- All policies and procedures that are applicable to the employee's duties as they relate to potential
  exposures to SARS-CoV-2. It is helpful to provide employees with a written copy of those standard
  operating procedures.
- Information on appropriate social distancing and hygiene practices, including:
  - Avoiding physical contact with others and maintaining a distance of at least 6 feet from customers and other individuals, whenever possible, including inside work trailers.
  - Appropriate cleaning practices (i.e., washing hands frequently with soap and water for at least 20 seconds, or, if soap and water are not immediately available, using alcohol-based hand sanitizer that contains at least 60% alcohol and rubbing hands until they are dry; sanitizing all surfaces workers will touch).
  - o The proper way to cover coughs and sneezes following CDC recommendations (i.e., sneezing or coughing into a tissue or into the upper sleeve).
  - o Alternatives to shaking hands upon entry, and the importance of workers not touching their own faces (mouth, nose, eyes).
  - The benefits of driving to work sites or parking areas individually, when possible, without passengers or carpools.
- The types, proper use, limitations, location, handling, decontamination, removal, and disposal of any PPE being used.
- The importance of staying home if they are sick.
- Wearing masks over their noses and mouths to prevent them from spreading the virus.
- The need to continue using other normal control measures, including PPE, necessary to protect workers from other job hazards associated with construction activities.
- Using Environmental Protection Agency-approved cleaning chemicals from List N or that have label claims against the coronavirus for cleaning frequently touched surfaces like tools, handles, and machines.
- The need to report any safety and health concerns.

TEREAS, INC. implement standard operating procedures and employee training to ensure that, **before entry** into home environments or areas where construction is ongoing in occupied buildings, workers:

- Request that any individuals under quarantine or isolation who have been diagnosed with COVID-19 or are experiencing signs and/or symptoms of COVID-19 remain physically separated from the worker (e.g., in a different room, on a different level of the home or building, or outside if weather and applicable emergency orders permit) and communicate remotely with the worker (e.g., by cell phone, using internet-based payment systems and electronic signatures to confirm that work was completed).
- Ask individuals in the workplace to wear a cloth or other face covering, if available, and to cover coughs and sneezes.
- Request that shared spaces in the construction area have good air flow, such as by turning on an air conditioner or opening windows, weather permitting, consistent with <u>CDC recommended</u> precautions for people in households.

#### **Cloth Face Coverings in Construction**

CDC recommends wearing cloth face coverings as a protective measure in addition to social distancing (i.e., staying at least 6 feet away from others). Cloth face coverings may be especially important when social distancing is not possible or feasible based on working conditions. A cloth face covering may reduce the amount of large respiratory droplets that a person spreads when talking, sneezing, or coughing. Cloth face coverings may prevent people who do not know they have the virus that causes COVID-19 from spreading it to others. Cloth face coverings are intended to protect other people—not the wearer.

Cloth face coverings are not PPE. They are not appropriate substitutes for PPE such as respirators (like N95 respirators) or medical facemasks (like surgical masks) in workplaces where respirators or facemasks are recommended or required to protect the wearer.

While wearing cloth face coverings is a public health measure intended to reduce the spread of COVID-19 in communities, it may not be practical for workers to wear a single cloth face covering for the full duration of a work shift (e.g., eight or more hours) on a construction site if they become wet, soiled, or otherwise visibly contaminated during the work shift. If cloth face coverings are worn on construction sites, employers should provide readily available clean cloth face coverings (or disposable facemask options) for workers to use when the coverings become wet, soiled, or otherwise visibly contaminated.

Employers who determine that cloth face coverings should be worn at a construction site, including to comply with state or local requirements for their use, should ensure the cloth face coverings:

- Fit over the nose and mouth and fit snugly but comfortably against the side of the face;
- Are secured with ties or ear loops;

- Include multiple layers of fabric;
- Allow for breathing without restriction;
- Can be laundered using the warmest appropriate water setting and machine dried daily after the shift, without damage or change to shape (a clean cloth face covering should be used each day);
- Are not used if they become wet or contaminated;
- Are replaced with clean replacements, provided by employer, as needed;
- Are handled as little as possible to prevent transferring infectious materials to the cloth; and
- Are not worn with or instead of respiratory protection when respirators are needed.

#### Safe Work Practices

To the extent possible, TEREAS, INC., screens all visitors on all construction sites on a daily basis before entrance to the job site for signs and symptoms of COVID-19.

TEREAS, INC Identifies choke points where workers are forced to stand together, such as hallways, hoists and elevators, ingress and egress points, break areas, and buses, and implement policies to maintain social distancing.

TEREAS, INC., in elevators and personnel hoists, ensure 6 feet distance between passengers in all directions and equip operators with appropriate respiratory protection and other necessary PPE.

TEREAS, INC coordinate site deliveries in line with the employer's minimal contact and cleaning protocols. Delivery personnel should remain in their vehicles if at all possible.

TEREAS, INC., Institute a rigorous housekeeping program to reduce dust levels on the job site.

TEREAS, INC. Keeps in-person meetings (including toolbox talks and safety meetings) as short as possible, limit the number of workers in attendance, and use social distancing practices.

TEREAS, INC is committed to ensure clean toilet and handwashing facilities. Clean and disinfect portable job site toilets regularly. Fill hand sanitizer dispensers regularly. Disinfect frequently touched items (i.e., door pulls and toilet seats) regularly.

## Flexibilities Regarding OSHA's PPE Requirements and Prioritization of PPE During COVID-19

Some employers may experience shortages of PPE, including face shields and respirators, as a result of the COVID-19 pandemic.

See information on PPE flexibilities and prioritization in the <u>Personal Protective Equipment Considerations</u> section within the <u>Interim Guidance for U.S. Workers and Employers of Workers with Potential Occupational Exposures to SARS-CoV-2</u>, above.

## Responding to an Employee's Positive Coronavirus Test

TEREAS, INC. is committed to handling the situation swiftly to protect the health of other employees while preserving the affected employee's confidentiality. In addition to notifying the co-workers and our customers, TEREAS, INC. will also carry out disinfection methods for the office, equipments and work areas and evaluate next steps.

# Responding to an Employee

When an employee notifies TEREAS, INC. that he or she is sick with COVID-19, TEREAS, INC. responds accordingly and empathetically. In these uncertain times, it can be easy to overreact, but you need to ensure that the infected employee is treated with compassion. Reassure the employee that their identity will remain confidential, and be sure to help them coordinate taking leave or paid time off until they've recovered.

TEREAS, INC. will also ask the employee some potentially difficult questions, including whom the employee has been in contact with in the last two weeks. Obtaining this information is essential so that TEREAS, INC. can directly notify customers and other employees that they may have been directly exposed to COVID-19.

## **Notifying Employees and Customers**

Without disclosing the identity of the infected employee, TEREAS, INC. will notify co-workers, customers and the rest of the company.

Directly notify any co-workers or customers whom the ill employee had been in contact with. Remain calm and let them know that someone they have been in contact with or has been in their physical work area has tested positive for COVID-19. Recommend that they should self-quarantine for the next 14 days and monitor themselves for the symptoms of COVID-19. If feasible, allow eligible employeesvto work from home during this time. The rest of the company will be notified by email or letter that an employee has tested positive for COVID-19. Employee's identity will be protected and response trasparent. Communication will include what steps TEREAS, INC. will be taking to protect the health of other employees.

## Disinfecting the Office

According to the Centers for Disease Control and Prevention (CDC), COVID-19 can remain on hard surfaces for up to 12 hours, creating a potential risk of transmission. If need be Tereas, Inc. will shut down for disinfection of all office, site equipment, work areas and to include and not limited to lunch areas etc. All areas which the employee may have touched will be disinfected. Business will resume once disinfection is done. At TEREAS, INC. the health and safety of our employees, our partners, customers and our vendors are our priority.
