

# The Japanese School of Guam

**Principal of the school: Masatoshi Kudo**

June 3, 2020

## **School Policy for Summer Session**

COVID-19 Disease Prevention in Conjunction with School Reopening – Summer 2020

The Japanese School of Guam recognizes the need to implement a well-organized plan to minimize the risk of transmission of COVID-19 disease to members of our school community of students, educators, administrative staff and other employees, as well the parents of our students. The school administration has evaluated the situation and in conjunction with advice and guidance received from the Governor of Guam's Physician Advisory Group, has prepared a well-designed plan that will accomplish our goal of having an educational environment that is safe for our students, teachers and administrative staff. The plan has been tested to the extent possible, and will be strictly implemented. Members of the Physician Advisory Group conducted an on-site review of the facilities. All of those working at the school have reviewed the plan, provided input and are comfortable with their safety having been addressed.

## School Arrival

### Teachers / Staff:

Arrival times are scheduled and are staggered to minimize the number of people arriving at the school at any given time. The teachers and staff of the school will only park in a specifically designated parking lot. It is not the same parking lot as that used for dropping off students and is located in a place that does not allow for mixing of staff and students prior to pre-entry screening. They will all wear facial masks starting before they exit their cars. Social distancing will be practiced while proceeding from cars to the entrance for teachers and staff.

All teachers and staff will be asked health screening questions (form attached). If all questions are negative, they will have their temperature taken via an in ear thermometer. The school has several new in ear thermometers and more than 1000 disposable covers. Only one person will be taking teacher/staff temperatures each day. The name of the people who are checked each day will be recorded. If no fever is detected, the individual will then either wash their hands with soap and water or use hand sanitizer before entering the school. Staff have a designated outdoor sink allowing for hand washing before entering any room at the school. School supplied hand sanitizers will be available at the teacher and staff entrance.

If a teacher or staff member does not have a clean mask, the school will provide one.

### Students:

Student arrival times are to be staggered by grade level to minimize the number of people at the school at any given time. All students will arrive by car or the school owned bus. They will all wear facial masks that will be put on as their private cars arrive at the school. Students are required to wear a mask at all times when on the school owned bus and will be separated by at least 2-meters while on the bus.

Students will be dropped off in the specifically designated parking lot immediately in front of the school. It is not the same parking lot as that used for the teachers or staff and is located in a place that does not allow for mixing of staff and students prior to pre-entry screening. Social distancing will be practiced while proceeding from cars to the designated student entrance. Red lines have been painted on the parking lot at 2-meter gaps to guide social distancing. There will be teachers and/or staff present in the parking lot to monitor and direct arriving students.

Parents will stay in their cars unless it is absolutely necessary for them to exit. If they do need to exit, they will be directed to park their car and to wear a mask and practice social distancing of 2 meters. They will be directed to conduct all non-urgent school related administrative

activity outside of school drop off and pick up times.

All students will be provided a health screening form prior to the first day of school (form attached). If all questions on the form are reported as negative with no fever or symptoms reported, the student will have his or her temperature taken via a no-touch forehead thermometer. The school has several new no-touch thermometers. Only one person will be taking student temperatures each day. The name of the students attending school each day will be recorded. If there is no fever detected, the student will then use school supplied hand sanitizer before entering the school. For those students with skin conditions not allowing for use of hand sanitizer, there is an outdoor sink for students allowing for hand washing before entering any room at the school. If a student's hands are visibly dirty, hand washing with soap and water will be required. The school will supply hand washing soap.

If a student does not have a clean mask, the school will provide one.

## **School Departure**

### **Teachers / Staff:**

Social distancing will be practiced while proceeding from the dedicated school staff exit to their cars. As with the arrival at school, they will use a parking area designated for teachers and staff only.

Each teacher or staff member will either wash their hands or use hand sanitizer before exiting the school. Staff have a designated outdoor sink allowing for hand washing just prior to exiting the campus. All teachers and staff will be asked health screening questions prior to leaving the campus (form attached). They will have their temperature taken via an in ear thermometer. Only one person will be taking teacher/staff temperatures at the end of each day. The name of the people who are checked each day will be recorded. If all questions are negative and no fever is detected, the teacher or staff member will be cleared to return the next school day.

### **Students:**

Student departure times are to be staggered by grade level to minimize the number of people at the school at any given time. All students will only depart by car or the school owned bus. Students will be picked up in the specifically designated parking lot immediately in front of the school. It is not the same parking lot as that used for the teachers or staff and is located in a place that does not allow for mixing of staff and students at the end of school. Just prior to proceeding to the parking lot, the student will use school supplied hand sanitizer. For those students with skin conditions not allowing for use of hand sanitizer, there is an outdoor sink

that is for students allowing for hand washing just prior to leaving the school. Social distancing will be practiced while proceeding from the designated student exit to their car or the School owned bus. Red lines have been painted on the parking lot at 2-meter gaps to guide social distancing. If taking the bus, all students will wear a facial mask on the bus and will be separated by at least 2-meters. There will be teachers and/or staff present in the parking lot to monitor and direct departing students. Parents will stay in their cars unless it is absolutely necessary for them to exit. If they do need to exit, they will be directed to park their car and to wear a mask and practice social distancing of 2-meters. They will be directed to conduct all non-urgent school related administrative activity outside of school drop off and pick up times.

All students will have their individual health screening forms returned to them upon exiting the school to be certain they take the form home and will be reminded to complete it the next morning – before coming to school.

### **In Class Protocol**

General: There will never be more than 15 persons in any classroom at the school, to include classrooms. Fewer will be allowed if social distancing in a classroom at 1.5 meters (5 feet) cannot be maintained.

#### Teachers / Staff:

All teachers and other staff will wear a mask at all times while in a classroom. They will use school supplied hand sanitizer or will wash their hands prior to and upon leaving a classroom. The school has installed hand sanitizer dispensers outside of all classrooms. The teachers will maintain social distancing in the classroom and will supervise students, ensuring they are separated by 1.5meters (5 feet) in the classroom. Teachers will make sure all desks are facing forward during teaching. Other than at designated times for eating, no food consumption will take place in the classroom. Teachers will bring their own water to school.

#### Students:

All students will wear a mask at all times while in a classroom. They will use school supplied hand sanitizer or will wash their hands prior to and upon leaving a classroom. The school has installed hand sanitizer dispensers outside of all classrooms. Students will maintain social distancing in the classroom and will refrain from moving about unless directed by their teacher. They will not move their desks which are all facing forward during teaching. Other than at designated times for eating, no food consumption will take place in the classroom. Students will bring their own water to school.

## **Lunch Protocol**

### **Teachers / Staff:**

All teachers and other staff will eat at designated times which are staggered. Teachers may elect to eat in their classroom or may use the faculty lounge. The lounge has been arranged to allow for social distancing of 2-meters (6 feet) with no more than 12 people in the lounge at any given time. They will use school supplied hand sanitizer or will wash their hands prior to and upon leaving the faculty lounge and will only remove their mask while eating lunch. The school has installed hand sanitizer dispensers outside of the faculty lounge. Teachers will bring their own water to school.

### **Students:**

All students will eat at designated times which are staggered by classroom. Students will wash their hands with soap and water prior to and after eating lunch. Students will eat in their classroom. Students will bring their own water to school. Students will remove their mask while eating lunch. Each student is responsible for maintaining a clean eating environment. This will be supervised by their teachers.

Note: there is no snack time at The Japanese School of Guam.

## **Special Subjects Protocol**

### **Special Topics:**

Special subjects, such as drama or music, will be taught in the students' main classroom. The teacher for the special subject class will bring any required supplies and equipment to the classroom to decrease movement of students within the school.

All equipment, supplies and instruments will be cleaned/sterilized before and after use using school supplied cleaners and using the school approved protocol.

## **Nap Time Protocol**

Sleeping cots for kindergarten will be separated by at least 2-meters. Any pillow or blanket used will be provided by the parents and will be sent home in a plastic bag to be washed every day at a high temperature and thoroughly dried.

## **Playground / Gymnasium Protocol**

Use of the playgrounds and gymnasium for students recess will be staggered by classroom and no more than 25 students will use the playground or gymnasium at the same time.

Students will be supervised by two adults at all times while on the playground to ensure social distancing is practiced to the extent possible. Students will remove their masks while on the playground to avoid excessive moisture and to allow adequate air intake during time on the playground.

Students and the monitoring adults will use school supplied hand sanitizer or will wash their hands prior to and upon leaving the playground area.

## **School Gatherings Protocol**

There will be no large schoolwide performances, such as plays or concerts. There will be no off-campus gatherings or performances. Small in-classroom performances will be allowed so long as the in classroom protocols are followed.

For educational or administrative gatherings requiring space larger than a classroom, only the school gymnasium will be used. The doors of the gymnasium extend along two entire walls. They will be open to allow circulation of air whenever the gymnasium is occupied. Gymnasium seating will be separated by at least 2-meters (6 feet). The total number of people in the gymnasium will not exceed that allowed by the Government of Guam.

## **School Visitor Protocol**

The school will make an effort to minimize visitors. A visitor is defined as a non-current student, teacher or employee of The Japanese School of Guam. All parents, vendors and others needing to address administrative issues will be requested to do so by phone or video conference whenever possible. No visitors will be allowed during drop off or pick up time periods. Other than for urgent matters, appointments will be required.

All visitors will park in the student parking lot and all will be required to wear a mask or appropriate face covering. They will only use the designated visitor entrance. The student entrance is not to be used and a guard is employed to ensure compliance. A camera is

used to monitor the visitor entrance.

Visitors will push a button that indicates there is a visitor. When the identity of the visitor is confirmed, he or she will be buzzed-in as the door is locked. Visitors will be confined to the designated visitor area which is physically separated from the administrative staff who will be interacting with the visitor. There is a four-foot-tall wooden barrier and a Plexiglas barrier at the site of direct interaction. It has a slot for exchanging documents. Only one visitor at a time will be allowed.

There will be no use of school volunteers. There will be no visiting students or student exchanges. There will be no close interaction between students and visitors.

### **Bathroom /Toilet Protocol**

Social distancing at 2-meters (6 feet) will be practiced prior to entering and while inside the bathroom. Red lines have been painted on the concrete outside of the bathrooms indicating the required spacing for those waiting to enter the bathroom. Every other urinal will be used. All students, teachers, administrative staff and other employees will either wash their hands or use the school supplied hand sanitizer prior to entering a bathroom. They will also wash their hands upon leaving the bathroom. A sink and school supplied hand sanitizer and soap are located immediately outside the student bathroom.

### **School Personal Hygiene Protocol**

#### **Social Distancing:**

All parents have been sent emails regarding social distancing and all teachers, administrators and other employees have received instructions. Students will be instructed with regard to social distancing on the first day they return to school. Students will also be taught to avoid getting too close to one another at any time, especially when on the playground or in the gymnasium. The instructions will be provided in a language understood by the individual student with use of a translator if needed.

#### **Mask Use:**

The Japanese School of Guam requires all students, teachers, administrators and other employees to wear a mask while on campus or on the school owned bus. The use of masks during eating and recess are discussed elsewhere. Visitors, defined as a non-current student, teacher or employee of The Japanese School of Guam, will be required to wear a

mask or appropriate face covering at all times while on the school campus.

The school currently has and will maintain a supply of face masks for students, teachers and employees as well as visitors who forget to bring a mask, have a dirty or a damaged mask.

Exceptions allowing for reasonable accommodation will be made for any member of the campus who has respiratory or other health condition/s that makes wearing a medical mask not the best choice for that student, teacher or other employee.

Every member of the school community is to bring an extra mask to school each day.

#### Water Fountain Use:

As has been explained to all teachers, administrators and other employees, there will be no direct drinking of water from fountains. The fountains can be used to fill cups and other containers. This has been explained to parents via email. The students will be trained regarding water fountain use on the first day they return to school.

#### Hand Washing:

Everyone at the school will be encouraged to wash their hands frequently. They will be advised to avoid touching their eyes, nose or mouth, especially with unwashed hands.

All parents have been sent emails and all teachers, administrators and other employees have received instructions regarding proper hand washing technique. The students will be trained the first day they return to school and observed washing their hands to ensure the proper technique has been learned. Although hand sanitizer will be widely available, if the person's hands are visibly dirty, they will be instructed to wash their hands with soap and water.

The school will provide paper towels for hand drying. The use of personal towels to dry hands will be prohibited.

As detailed in the arriving and departure sections of this document, everyone will either wash their hands or use school provided hand sanitizer before entering and just prior to leaving the school.

As detailed in the classroom protocol section of this document, everyone will either wash their hands or use school provided hand sanitizer before entering and upon leaving a classroom, a bathroom or the faculty lounge.

All students, teachers, administrative staff and other employees will be instructed to wash their hands after blowing their nose or sneezing.

All students, teachers, administrative staff and other employees will be instructed to avoid touching their mouth, nose or eyes or wiping their face with their hands.

All students, teachers, administrative staff and other employees will be instructed to bring a clean soft towel to school every day to wipe their face if needed. The towels will not be used to dry hands after washing. They are to keep the cloth with them and not share it with anyone. They will bring it home every day for washing. The parents will be instructed to use the warmest/hottest setting and to thoroughly dry the cloth.

Students experiencing a reaction to the school supplied hand sanitizer may wash their hands with soap and water. They can use an alternative brand of hand sanitizer upon approval of the school for the specific brand they would like to use. It must be an alcohol-based sanitizer that contains at least 60% alcohol.

The school will maintain hand sanitizer dispensers outside each classroom, the gymnasium, administrative offices, the bathrooms and the faculty lounge. Sinks are available outside for students, teachers, administrative staff and other employees, including outside the student bathroom.

Anyone who has provided routine care for another person who needs assistance such as a child will wash his or her hands as soon as possible after the care has been rendered.

For students under six years of age, hand sanitizer use will be used under the supervision of an adult.

## **School Environment Hygiene Protocol**

### **Rooms, including Classrooms:**

The Japanese School of Guam will follow United States Centers for Disease Control and Prevention (CDC) protocols for Cleaning and Disinfection for Community Facilities which are attached.

As part of the process of keeping the school hygienic, before classes start in the morning and between classes, the windows in each classroom and administrative area will be opened. During class and when administrative areas are occupied, the windows will be closed, and air

conditioning will be used with regular cleaning of the filters.

No rugs are used in classrooms.

Every day, after school, each classroom and administrative area will have all hard and porous surfaces used by the students and teachers cleaned and sanitized/disinfected using an EPA approved disinfecting agent. The cleaning will include commonly touched surfaces, such as door handles, door surfaces and desktops. For larger areas, for example floors, the CDC's guidelines regarding the use of dilute unexpired bleach will be used at a concentration of 5% - 6%. Proper ventilation will be used during and after cleaning and disinfecting. More frequent cleaning will be used upon the request of a teacher.

#### Bathrooms:

The Japanese School of Guam will follow the United States Centers for Disease Control and Prevention (CDC) protocols for Cleaning and Disinfection for Community Facilities which are attached. For bathrooms, all surfaces will be cleaned and disinfected twice a day. Once, after school ends and again after all lunch periods are over. All hard surfaces, such as sinks and toilets as well as doors and floors will be cleaned and sanitized/disinfected using an EPA approved disinfecting agent twice a day. For larger areas, for example floors, the CDC's guidelines regarding the use of dilute unexpired bleach will be used at a concentration of 5% - 6% at the end of each day. Proper ventilation will be used during and after cleaning. At the Japanese School of Guam, the doors to bathrooms remain open to improve ventilation without compromising privacy.

### **School Tracing Protocol**

#### General:

The school has policies that will make tracing easier should it be needed. As detailed in this document policies, are in place that are aimed at reducing the number of people on campus and the interaction those on campus have with one another. For example, the students will spend the vast majority of their time each day in the one classroom. Special topics will be held in the students' main classroom instead having all of the students move to another classroom.

The school will control the drop off and pick up time period to reduce interaction of students, with staff and other adults on campus. The student drop off and pick up areas are physically separated from the non-student parking, minimizing interaction when arriving or leaving the school.

Visitors are not allowed during drop off and pick up time periods. Visitors will not be allowed to interact with students or teachers unless clearly needed. Parents and potential visitors to the campus, such as vendors, have been asked to use telecommunication instead of in person visits whenever possible.

There will be no use of school volunteers. There will be no visiting students or student exchanges.

#### Teachers, Administrative Staff and other Employees:

All teachers, administrative staff and other employees are required to provide working telephone numbers, emails and their current home address. They have been instructed to notify the school if either change.

A log of days and hours worked at the school for all teachers, administrative staff and other employees will be maintained.

A list of all the information and the logged time on the school campus will be maintained by the school and will be provided to the Guam Department of Public Health upon request.

#### Students:

The parents of all students are required to provide working emails, contact telephone numbers and the current home address or addresses of their children. If their children attending The Japanese School of Guam are dropped off or picked up by someone other than a parent, the school requires that the same information is provided for that non-parent adult. The parents of the students have been instructed to notify the school of any change in the required information.

Logs will be kept regarding student attendance. It will include data regarding any excused absence or early departure from the school campus.

A list of all of the student and parental information and the attendance records will be maintained by the school and will be provided to the Guam Department of Public Health upon request

#### Visitors:

All visitors will be required to provide working telephone numbers, emails and their current home address. A log for recording this data is present at the visitor section of the

administrative office. It includes the time of arrival and departure of the visitor from the school. The log will be maintained by the school and will be provided to the Guam Department of Public Health upon request.

## **School Health Monitoring Protocol**

### **General:**

The Japanese School of Guam will closely monitor students, teachers, administrative staff and other employees.

### **Screening**

#### **Teachers, Administrative Staff and other Employees:**

Upon arrival each morning, all teachers and staff will be asked health screening questions (form attached). If all questions are negative, they will have their temperature taken via a thermometer that uses the ear. The school has several new in ear thermometers and more than 1000 disposable covers. Only one person will be taking teacher/staff temperatures each day. The name of the people who are checked each day will be recorded. This process is repeated at the end of the school day, prior to any teacher, administrative staff or other employee leaving the school campus. A normal temperature will be considered under 38 degrees centigrade (100.4 Fahrenheit).

#### **Students:**

All students will be provided a health screening form prior to the first day of school (form attached). The same form will be used for a week at a time. The form will be handed to a designated adult when the student arrives. The form will be reviewed. If all questions on the form are negative, the individual student will have his or her temperature taken via a no-touch forehead thermometer. The school has several new no-touch thermometers. Only one person will be taking student temperatures each day. If the temperature is above 38 degrees centigrade (100.4 Fahrenheit), it will be rechecked with an in ear thermometer.

#### **Holding room:**

The school has a specified holding room. The holding room will be used for those identified as possibly needing to leave the school campus based upon having a fever or other symptoms indicated in the monitoring section of this document. The holding room has easy

access to a door to the outdoors allowing for those in need of entering or leaving the holding room to not walk through any other room in the school. The room has a HEPA filtering system in place. There is no air conditioning duct or other method of air traveling to another room from the holding room.

Action:

If a student has a fever upon arrival, it will be verified with an in the ear measurement. If there is a fever confirmed with an in ear thermometer, the child will be brought to a designated holding room and will sit for five minutes. The student's temperature will be re-checked via an in ear thermometer. If found to still be elevated, the student's parent or other pre-authorized adult will be contacted and advised of the situation. The student will be required to leave the campus and the adult will be advised to have the child evaluated by his or her usual health care provider. The same action will be taken if the student health questionnaire has a positive answer for any signs or symptoms listed on the form.

The adult picking up the child will be provided a list of clinics providing evaluation and testing for COVID-19 for those without insurance. Telephone numbers and locations of the clinic will be provided.

If a teacher or other employee is found to have a fever upon arrival at the school, he or she will be brought to a designated holding room and will sit for five minutes. A temperature re-check via an in ear thermometer will be completed. If found to still be elevated, that teacher or other employee will be required to leave the campus and the adult will be advised to be evaluated by his or her usual health care provider and will be provided a list of clinics providing evaluation and testing for COVID-19 for those without insurance. Telephone numbers and locations of the clinics will be provided.

**Monitoring:**

During the day, teachers, administrative staff and other employees have been instructed to report to the principal if they experience any symptoms listed below. Students will report to their teachers if they experience any of the listed symptoms. Teachers have been instructed to monitor themselves and to the extent possible, their students, for any of these symptoms:

Cough

Congestion

Stomach/Abdominal pain

Vomiting

Diarrhea  
Loss of taste and/or smell sensation  
Sore throat  
Headache  
Difficulty Breathing  
Runny nose  
Fatigue / feeling listless or too tired  
Body aches

All of these symptoms have been explained to the parents and students as well as everyone working at the school. These are the same symptoms that parents have been instructed to monitor for and to record if present, prior to a student arriving at school.

Action:

If a student develops a fever during the day or reports any of the listed symptoms having develop, he or she will be brought to a designated holding room. This will occur whether the symptoms are self-reported or observed and reported by a teacher.

A fever will be considered present when the student's temperature is above 38 degrees centigrade (100.4 Fahrenheit) via two in ear measurements separated by five minutes the student's parent or another pre-authorized adult will be contacted and advised of the situation. The student will be required to leave the campus and the adult will be advised to have the child evaluated by his or her usual health care provider. The adult picking up the child will be provided a list of clinics providing evaluation and testing for COVID-19 for those without insurance. Telephone numbers and locations of the clinic will be provided.

If a teacher or other employee develops any of the symptoms listed, that teacher or other employee will be required to leave the campus and the adult will be advised to be evaluated by his or her usual health care provider and will be provided a list of clinics providing evaluation and testing for COVID-19 for those without insurance. Telephone numbers and locations of the clinics will be provided. The same shall occur if a fever develops. A fever will be considered present when a temperature is found to be above 38 degrees centigrade (100.4 Fahrenheit) via two in ear measurements separated by five minutes.

**Return to Campus:**

Students, teachers or other members of the school community who are asked to leave the campus or those who develop a fever or any of the symptoms listed while they are off campus will be instructed not to return to the school until they are fever and symptom free for 72 hours while not taking any medications used to treat fever or any of the symptoms.

Efforts will be made to remotely engage students and teachers during the days they are at home and are capable of joining their classrooms via Zoom, Skype or other remote communication link. The school has Wi-Fi in each classroom

### **SUMMARY**

The Japanese School of Guam recognizes that the health and well-being of all members of our school community is our highest priority. The school has a well thought out plan to address the hazards all face during the COVID-10 pandemic. Although we cannot eliminate all risks posed by opening our school, we have made all efforts to minimize them, allowing our students to resume their education. We have worked closely with members of the Governor of Guam's Physician Advisory Group. We have followed their advice in developing the school's protocols. We have had our plan reviewed several times by the physicians and have made adjustments as advised. We feel that our current protocols address the core principles involved including distancing, hygiene, tracing and early separation of those in our community who may become ill. If any member of our school community does develop COVID-19, The Guam Department of Public Health will be notified as will The Physician Advisory Group. We understand that both entities will evaluate the situation as the case is investigated and traced. This is a living document. The school appreciates any advice that the Physician Advisory Group or the Department of Public Health has regarding the school's protocols. Changes can be made as needed.

### INSTRUCTIONS TO ADULT SCREENER:

Record the name of the person in the log with the time in or out.

Ask the following questions:

**Are you experiencing any of the following symptoms?**

Cough	Congestion	Stomach/abdominal Pain	Diarrhea
Loss of taste/smell	Sore throat	Runny Nose	Feeling Listless
Headache	Difficulty breathing	Body aches	Vomiting

If the person said **yes** to any of the questions, please direct them to go to the designated holding room and notify the principal.

If the person answers **no** to all questions, take their temperature using the in-ear thermometer.

### Temperature

If the temperature is **under** 38 degrees centigrade (100.4 Fahrenheit) please direct the person to use the hand sanitizer or wash his/her hands with soap and water using the outside sink.

If the temperature is **above** 38 degrees centigrade (100.4 Fahrenheit), please direct them to the designated holding room and have them sit for 5-10 minutes and then recheck the temperature

If the temperature is **still above** 38 degrees centigrade (100.4 Fahrenheit) direct the person to stay in the isolation room and notify the principal.

## Health Observation Card

Week of \_\_\_\_\_ - \_\_\_\_\_

Take the child's body temperature every morning before school and at night before bedtime. Write the temperature in the corresponding box. Bring this card to the school with your child. If this card is forgotten, your child may not be able to attend school. If your child has a fever or a cold, please rest at home.
